

# The Professional Range for Plaster Casts and Dressings

Medical technology with its surgical instruments and devices has been our special area for many decades. We have extensive experience in this special area. Science and technique combined with the latest knowledge all go together in our daily service for our customers throughout the world.

Our range of all areas of general surgery includes over 8,000 various products. Due to our company's vast and exact manufacturing as well as the variety manufactured, an unusual closeness to the current market and flexible production politics is guaranteed. It guarantees us to always be the competent and reliable partner for you.

The consistent high quality standards of our products speak for themselves. Not only is quality solely controlled, it is produced from the beginning. Through our ingenious QM-System, it is always guaranteed that only the best quality leaves our company. We are, among others, certified according to DIN EN ISO 13485, DIN EN ISO 9001:2000 and EC-Guidelines 93/42/EWG.

## HEBU Oscillating Saw GOLD Plus

The new Oscillating Saw GOLD Plus allows all plaster cast and synthetic dressings to be cut off quickly, quietly, safely and exactly. This is possible due to its strong motor and ergonomic design, which also allows for easy handling. Due to an infinitely variable speed control, the saw blade revolutions can be precisely set to the respective requirements. Motor cooling occurs due to a circulation principle. Cool air is taken in at the end of the motor.

Therefore the drive assembly is protected and cannot become sticky due to plaster or synthetics.

The GOLD Plus comes with a Round Saw Blade HB 8895-02 (Ø 50 mm) and HB 8896-02 (Ø 65 mm) for synthetic dressings.

GOLD Plus (230V)**

## HEBU Oscillating Saw GOLD Plus Autopsy

This saw has the same constructive characteristics as the GOLD Plus. Functionality and quality are always in the foreground. Due to the area of usage of the GOLD Plus Autopsy, the saw can be sterilized, something that is necessary. As a result, the easy to remove saw head has pressure balance bore holes. This guarantees perfect functioning of the saw despite high temperatures during sterilization.

The GOLD Plus Autopsy comes with a Segment Saw Blade HB 8892-01 (Ø 65 mm) and a Deep Saw Blade HB 8893-01.

**HB 8891

Motor cooling due to a circulation principle

Speed controller for precise adjustment of the rotation of the saw blades

Ergonomic On/Off Switch

Saw Blades can be easily changed

### HEBU Oscillating Saw GOLD Accu

Due to the fact that the GOLD Accu does not have a bothersome mains cable, this makes it ideal for mobile usage. The power supply comes through the accu with a high capacity. Therefore, it can be taken everywhere and it performs perfectly even though no electrical network is available.

The housing is formed according to ergonomic criteria and guarantees safe and fatigue-free use.

The GOLD Accu comes with a charger as well as a Round Saw Blade HB 8895-02 (Ø 50 mm) and a Round Saw Blade HB 8896-02 (Ø 65 mm) for synthetic dressings.

**HB 8874

### HEBU Oscillating Saw GOLD Accu Autopsy

The special area of usage of this oscillating saw is already stated in its name. Due to its design as an accu device, it is mobile and independent from power supply. The saw head has pressure balance bore holes. As a result, this saw model can be sterilized. The GOLD Accu Autopsy comes with a charger as well as with a Segment Saw Blade HB 8892-01 (Ø 65 mm) and a Deep Saw Blade HB 8893-01.

Saw Blades can be easily changed

### HEBU Oscillating Saw TITANIUM Plus

A new Oscillating Saw was developed with the TITANIUM Plus, which is specially designed for hard usage in orthopedic workshops. Due to its extravagant bearing, a combination of ball and needle bearings, it is appropriate for continual usage. The infinitely variable speed control in a range of 12000 - 21000 R/min. allows the rotations of the saw blades to be set to the respective requirements. Motor cooling occurs due to a circulation principle. Cool air is taken in at the end of the motor. Therefore the drive assembly is optimally protected from saw dust and soiling. The TITANIUM Plus comes with the specially robust new Round Saw Blades HB 8895-03 (TITANIUM) Ø 50 mm and HB 8896-03 (TITANIUM) Ø 65 mm.

**HB 8884

### HEBU Oscillating Saw TITANIUM Accu

This saw has the same constructive characteristics as the TITANIUM Plus. Here, the power supply comes through a quick chargeable accu with a high capacity. Due to the fact that the saw does not have a bothersome mains cable, this makes it ideal for mobile usage. Fatigue-free and safe usage is therefore guaranteed as strict ergonomic criteria were taken into account during design. The TITANIUM Accu comes with a quick charger as well as the Round Saw Blades HB 8895-03 (TITANIUM) Ø 50 mm and HB 8896-03 (TITANIUM) Ø 65 mm.

**HB 8885

Motor cooling due to a circulation principle

Perfect and reliable drive assembly technique

Saw Blades can be easily changed

High quality needle and ball bearings for precise functioning

## HEBU Oscillating Saw ECO Plus

Plaster cast and hard plastic dressings are no problem for this one hand Oscillating Saw. It allows for exact and safe cutting. Its ergonomic form and compact construction make it easy to handle. Due to the turning knob of the electrical speed control, the rotations of the saw blade can be easily adjusted to the respective requirements. The ECO Plus comes with a Round Saw Blade HB 8896-01 (Ø 65 mm) for plaster casts and with a Round Saw Blade HB 8896-02 (Ø 65 mm) for synthetic dressings.

**HB 8880  
ECO Plus (230V)**

Speed controller for precise adjustment of the rotation of the saw blades

Ergonomic On/Off Switch

In order to use the HEBU devices worldwide depending on the various power sockets, the saws and dust removal system are available with various plugs and currents. When ordering, the respective plug type is to be designated by the Art. No.

### HEBU Dust Extractor

For all GOLD and TITANIUM Oscillating Saws

In order to minimize the inhalation of dust of employees and to prevent bothersome dust in the working area and working rooms, the HEBU Dust Extractor was developed. It sets itself apart through an especially high working efficiency and fits to all GOLD and TITANIUM Oscillating Saws. To install the efficient dust extractor in no time at all, only normal tools are required. In combination with the Vacuum Cleaner HB 8881 and its outlet, that is specially made for the HEBU Cast Cutters, the dust extractor system is automatically switched on and off when the saw is used. The operation of a second switch is no longer necessary.

### HB 8888

Complete with Saw HB 8884, Vacuum Cleaner + Tube + Dust Removal Unit + Holder + Tools.

### HB 8889

For Upgrading: Vacuum Cleaner + Tube + Dust Removal Unit + Tools

Dust Removal Unit

Paper Filter Bags as a helpful accessory

Eco-Flat Folding Filter for Wet and Dry vacuuming

Flexible and robust tube with bayonet connector

### HEBU Vacuum Cleaner

This versatile and compact vacuum cleaner with its eco-flat folding filter technique is specially designed for the suction/vacuumping of fine, dry cast cutting dust from plaster and synthetic casts. The enormous suction/vacuum performance of the bypass-turbine is 1.380 Watts by an air flow rate of 57 l/min and a vacuum of 235 mbar. 99,97% of all particles are filtered from the exhaust that are larger than 0,5µm. For rational working, the dust removal system comes with an outlet that is specially designed for HEBU Oscillating Saws. Standby-mode takes over the automatic switching on and off of the suction/vacuum function. The saw can be laid on the vacuum cleaner.

### HB 8881

Vacuum Cleaner without accessories (230 V)

**HB 8882** Tube, complete; 2m

**HB 8886-01**

Paper Filter Bags 5 Each

**HB 8886-02**

Wet Filter Bags 5 Each

**HB 8887-01**

Flat Folding Filter

**HB 8887-02**

Flat Folding Filter, HEPA-Norm

**HB 8883**

Hanger fixture for HEBU Oscillating Saw. With handle bar, adjustable height, scratch resistant, can be up-graded at any time.

### HEBU Patent Screw

The newly constructed saw blade holding fixture, where a patent is being applied for is now available as a practical accessory. The "Patent Screw" allows the saw blade, on all HEBU Oscillating Saws, to be fixed and removed without any tools and only with one hand.

The "Patent Screw" guarantees even by the highest of demands, an absolute firm fit of the saw blade.

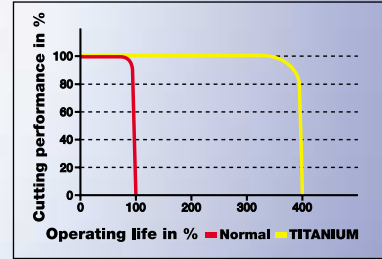

#### HB 8878

Patent Screw for all HEBU Oscillating Saws GOLD and TITANIUM

### Round Saw Blade TITANIUM

This newly developed saw blade is better than anything currently available. The main characteristic of this one of a kind product is the above average long life. It is nearly 400% in comparison with conventional saw blades. This is achieved not only due to high performance high speed steel (HSS) being used as the foundation material, but due to a special coating of Titanium Nitrate (TiN). This material combination makes it possible to cut very hard material, even metal. The TITANIUM Round Saw Blade fits all HEBU-Saws.
